Created For Use In All Facility Settings

Save Money, Save The Earth

Lighthouse Environmental Infection Prevention believes in providing the safest, most environmentally conscious products on the market. We are committed to providing quality products and services in a manner which ensures safety and limits the impact on our planet.

Single-Use is More Effective at Pathogen Removal

Dry mopping - Reductions of C. diff spores

The S1 and X1 Mops:

Scientific studies show that single-use microfiber is more effective.

Used in over 500 U.S Hospitals

Top Selling Microfiber Mop

Engineered with PathogenLock, for superior pathogen and soil removal

Improve HCAHPS

Improve your patients experience by using a new, clean mop every time.

CDC Temperature Requirements

160-190 (Degrees)

Destroys Microfiber

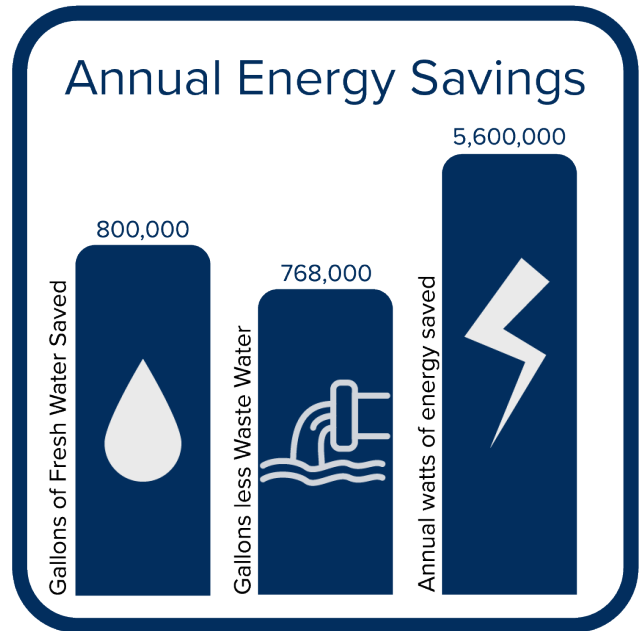

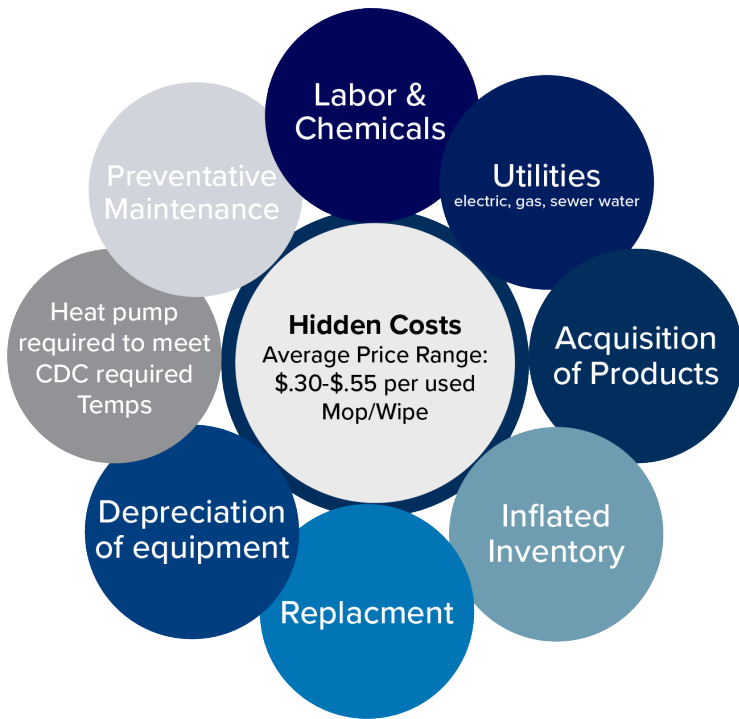

Microfiber Becomes Ineffective at Pathogen Removal

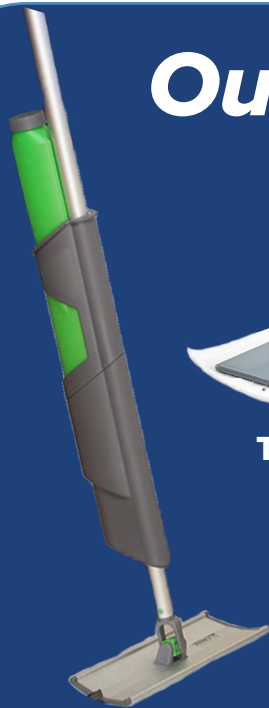

Laundry managed in-house contains active pathogens after laundering.

Single-Use Microfiber is Less Expensive than a Launderable Program
